

NIGHTWING

SHADOWSCOUT

FULL-SERVICE INTELLIGENCE

ShadowScout is Nightwing's answer to the modern threat intelligence gap—a fully managed threat hunting and cyber threat intelligence service that delivers complete, actionable insights to Security Operations Centers (SOCs) of every scale.

OVERVIEW

Nightwing handles all facets of the threat intelligence lifecycle and delivers actionable artifacts to accelerate positive security center operations outcomes. We can perform threat hunting for organizations that need certified hunters tackling the latest threats. And we can deliver intelligence for those looking to mature their own threat hunting programs. Nightwing's technical intelligence includes proprietary SIEM and EDR logic, malware reverse engineering and reports, dark web and social media monitoring, and external attack surface monitoring. We couple our technical intelligence with executive and business intelligence outputs to help organizations understand all their cyber risks and how to apply their defenses to tackle them.

Unlike fragmented threat feeds or data aggregation platforms, ShadowScout offers a curated, integrated intelligence experience that bridges the gap between raw data and operational defense.

KEY CAPABILITIES

- **Technical Intelligence:**
 - Proprietary SIEM and EDR logic
 - Malware reverse engineering
 - Vulnerability research and intel
 - Dark web and social media threats
- Executive intelligence including landscapes and briefings
- Business intelligence including third-party and supply chain risks
- Applied Intelligence
 - Managed security solutions
 - Digital forensics and incident response
 - Penetration testing

Led by world-class threat intelligence expert Nick Carroll and backed by Nightwing's seasoned incident response team, ShadowScout provides tailored threat briefings, real-time detection logic, dark web monitoring, and external attack surface visibility—all streamlined through a unified, cloud-hosted management portal. It doesn't just inform customers of risks; it equips them with detection content and strategic insight they can deploy immediately across their environments.

What sets ShadowScout apart is its commitment to delivering fully developed intelligence products, not just pieces of the puzzle. It transforms massive threat data sets into digestible packages for both technical teams and executives—accelerating defense decision-making without burdening analysts. Whether tracking ransomware syndicates, uncovering stealer malware with hidden documentation, or mapping attacker tactics in real time, the ShadowScout team provides intelligence that is sharp, current, and highly operational.

Customers choose ShadowScout because it enables them to outsource their most complex intelligence needs without compromising on quality or context. It is especially valuable in environments where teams are stretched thin, tools are fragmented, and leadership demands rapid, strategic insight. With a focus on streamlining operations and pioneering semi-autonomous and autonomous threat hunting capabilities, ShadowScout is designed for a future where lean, efficient, and high-impact cyber defense is a necessity—not a luxury.

At a time when threat actors evolve faster than tools alone can keep up, ShadowScout delivers an indispensable edge—arming organizations with the foresight, clarity, and tactical advantage needed to stay ahead of adversaries. It is not just a service; it is a force multiplier for SOC teams, fusing elite tradecraft with operational execution. In a crowded field of fragmented solutions, ShadowScout sets a new standard for what threat hunting as a service should be—proactive, complete, and relentlessly effective. That's not just worthy of recognition—it's worthy of winning.
