

# NIGHTWING

We don't just work on the cutting edge.  
We create it.

## WHO WE ARE

Nightwing is the national security solutions company defining the edge of possible to advance our national security interests. We employ some of the world's most groundbreaking technologies curated to support the complex challenges our customers face. Our promise: to deliver with agility, innovation, and an unfaltering commitment to our customers' missions, enabling them to outmaneuver any threat. We bring a deep set of credentials spanning more than four decades. Nightwing is proud to partner with government agencies, commercial businesses, and organizations to protect their most critical information, systems, and operations.

## WHAT WE DO

### **Cyber Operations & Defense**

We overcome the most advanced emerging security threats to deliver mission success through an elite team of industry experts and custom-developed technologies. We also use our expertise in offensive cyber operations to provide the full range of cybersecurity and cyber resiliency capabilities for all organizations, from public companies to governments.

### **High Consequence Missions**

We deliver mission-essential services and solutions that enable and enhance operational success in the most challenging environments.

### **Special Engineering & Logistics**

We deliver unmatched expertise and innovative technical solutions, seamlessly interconnecting critical, highly complex, and sensitive tip-to-tail global operations across all domains.

# OUR VALUES

01

## At home with the unknown.

We thrive in unfamiliar territory. We seek out challenges. We're the people you want in your corner when you have to solve the unsolvable.

02

## Constantly pursuing better.

Yesterday's best was great yesterday. But we know that tomorrow always requires more. We're hungry to keep setting the bar higher, to be ever smarter and faster than the adversary.

03

## In the fight together.

Team isn't a nice-to-have or a place to hide. It's the key to unlocking top performance. We treat it with the respect it deserves.

04

## Keeping our eyes on the mission.

We serve the mission above all else. We know that when we stay focused on that, everything else takes care of itself.

## OUR SOLUTIONS

We are investing in the capabilities and innovation areas that enable us to deliver what it takes to keep our customers ahead of the threat. These areas fuel our solutions and keep us on the leading edge of national security.

Focus innovation areas include:

### Cyber Operations

Reverse engineering, emulation, vulnerability research, and cyber tool development.

### Technical Collection

Uniquely tailored solutions for all aspects of integrated, end-to-end, test, and technology solutions, and mission-specific subject matter experts in response to dynamic operational requirements.

### Technical Reconnaissance

No-fail missions. Technically challenging environments, software & mobile application development, and tactical system integration.

### Secure Communications

Tailored secure communications, spanning the full spectrum of attribution, security, and capability needs.

### Cyber Defense

Managed detection and response, adversarial pursuit, threat intelligence, and national scale SOC/infrastructure operations.
